

Part III — Mechanics

Based on lectures by Brian

Notes taken by Dexter Chua

Lent 2017-2018

These notes are not endorsed by the lecturers, and I have modified them (often significantly) after lectures. They are nowhere near accurate representations of what was actually lectured, and in particular, all errors are almost surely mine.

Contents

1	Kinematics of a particles moving in a straight line	3
2	Dynamics of a particle moving in a straight line	4
3	Statics of a particle	5
4	Moments	6
5	Vectors	7
6	Kinematics of a particle moving in a straight line or plane	8
7	Centres of mass	9
8	Work , energy and power	10
9	Collisions	11
10	Statics of rigid bodies 1	12
11	Further kinematics	13
12	Elastic strings and springs	14
13	Further dynamics	15
14	Motion in a circle	16
15	Statics of rigid bodies 2	17
16	Relative motion	18
17	Elastic collisions in two dimensions	19
18	Resisted motion of a particle moving in a straight line	20
19	Damped and forced harmonic motion	21
20	Stability	22
21	Applications of vectors in mechanics	23
22	Variable mass	24
23	Moments of inertia of a rigid body	25
24	Rotation of a rigid body about a fixed smooth axis	26

1 Kinematics of a particles moving in a straight line

2 Dynamics of a particle moving in a straight line

3 Statics of a particle

4 Moments

5 Vectors

6 Kinematics of a particle moving in a straight line or plane

7 Centres of mass

8 Work , energy and power

9 Collisions

10 Statics of rigid bodies 1

11 Further kinematics

12 Elastic strings and springs

13 Further dynamics

14 Motion in a circle

15 Statics of rigid bodies 2

16 Relative motion

17 Elastic collisions in two dimensions

18 Resisted motion of a particle moving in a straight line

19 Damped and forced harmonic motion

20 Stability

21 Applications of vectors in mechanics

22 Variable mass

23 Moments of inertia of a rigid body

24 **Rotation of a rigid body about a fixed smooth axis**
